

Lab 01

GitHub Identity, Student Portal Registration, and Ubuntu Server Installation

Name: Amna Pervez

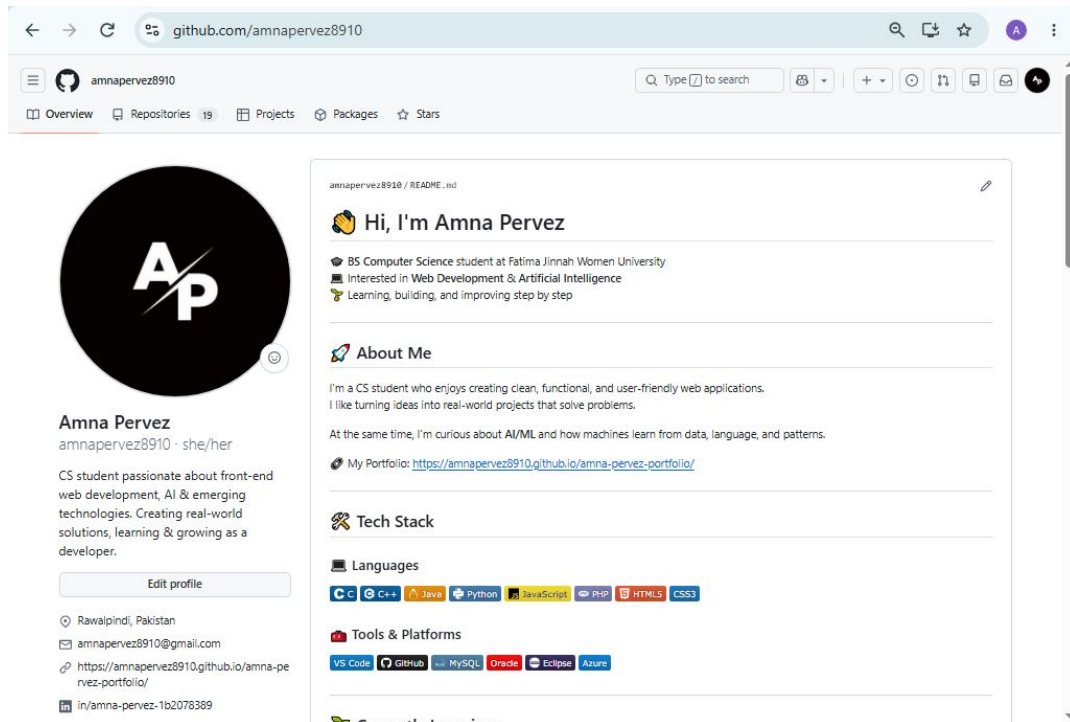

Registration Number: 2023-BSCS-10

Course Code: CS-649 (Cloud DevOps)

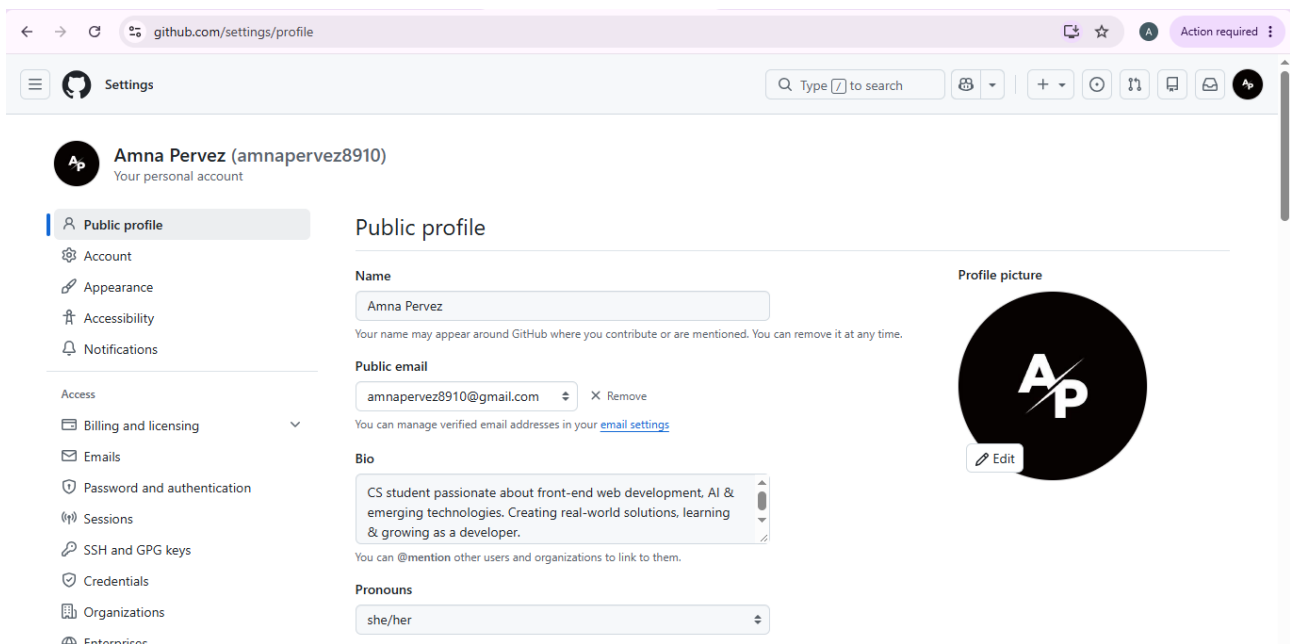

Section: A

GitHub Username: amnapervez8910

Task 1: Create and Configure Your GitHub Account

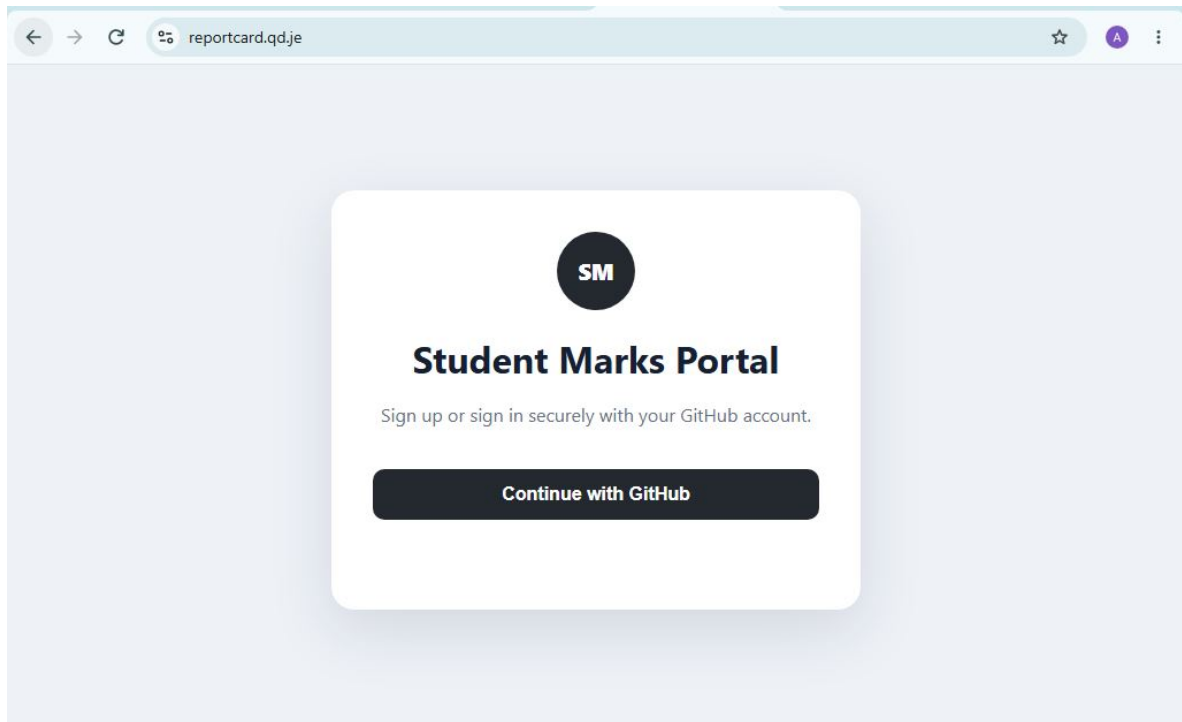

GitHub profile showing the name Amna Pervez and username amnapervez8910.

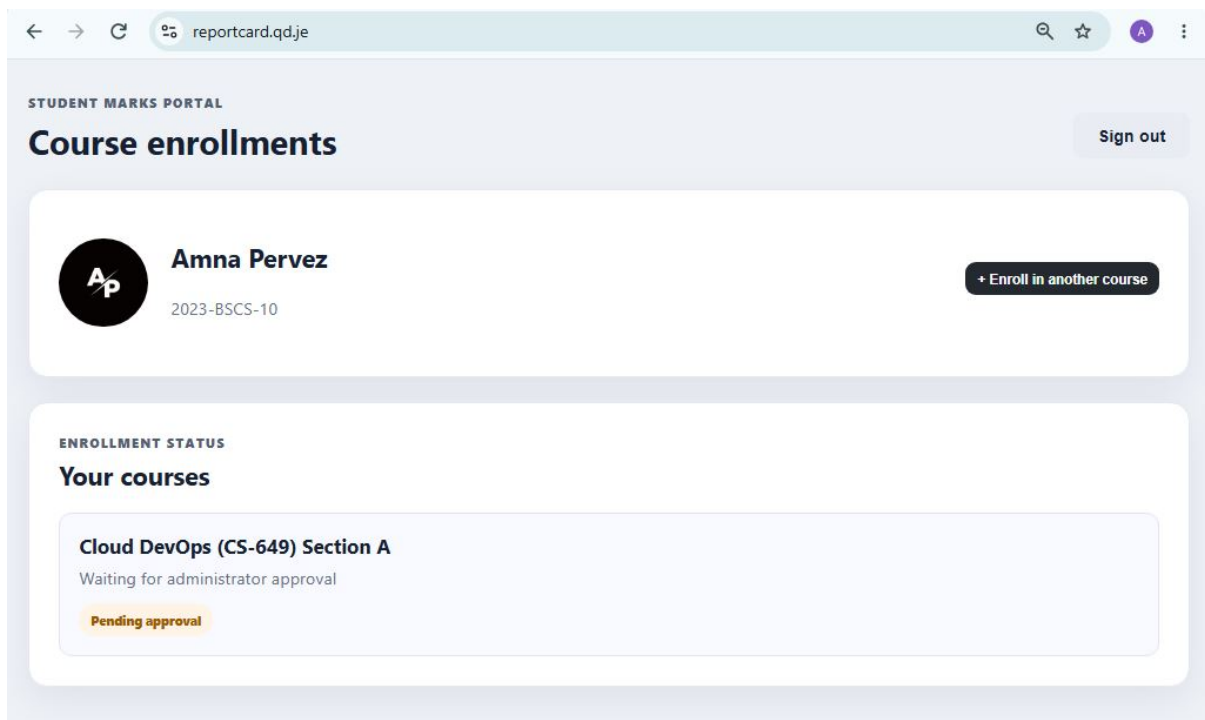

GitHub Settings > Public profile with the complete actual name (Amna Pervez) in the Name field.

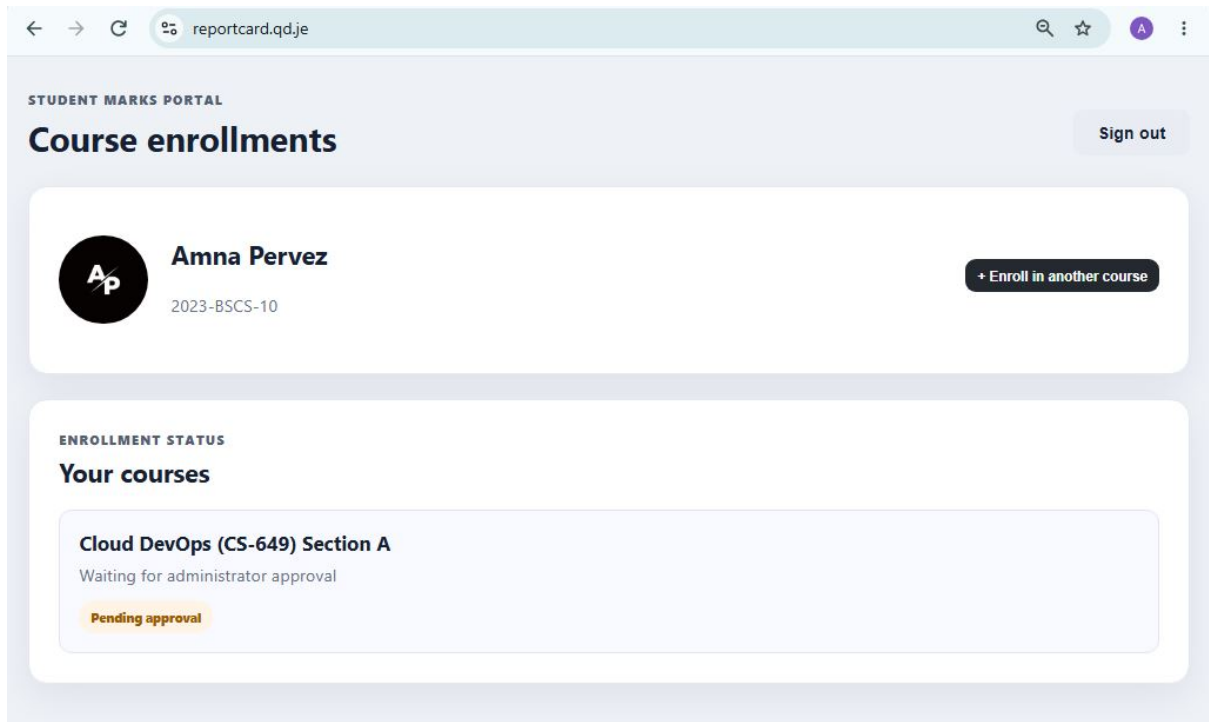

Task 2: Register in the Student Marks Portal

Student Marks Portal login page with the Continue with GitHub option.

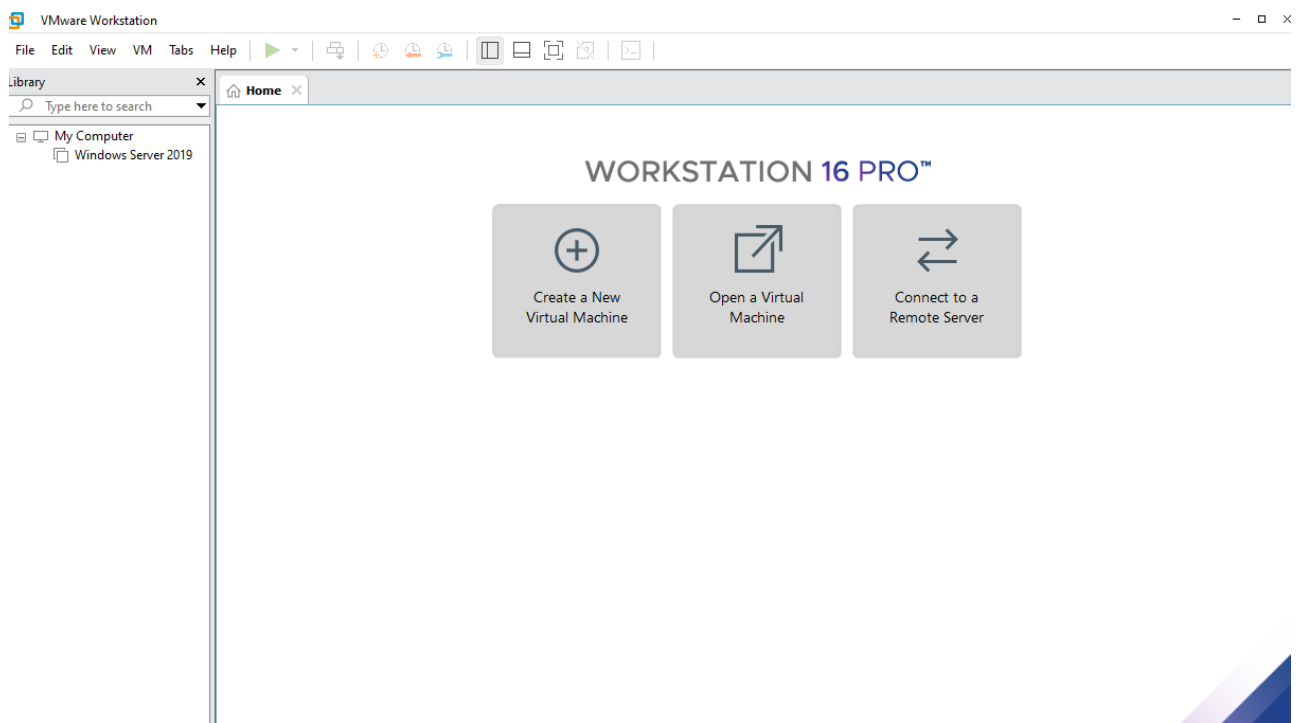

GitHub profile information (Amna Pervez, 2023-BSCS-10) shown inside the portal.

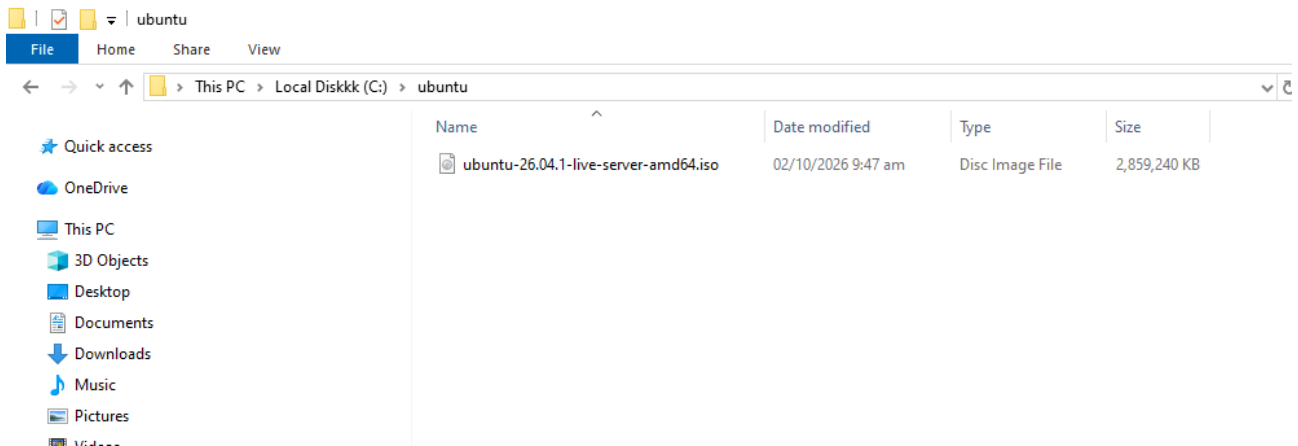

Enrollment in Cloud DevOps (CS-649) Section A submitted and pending approval.

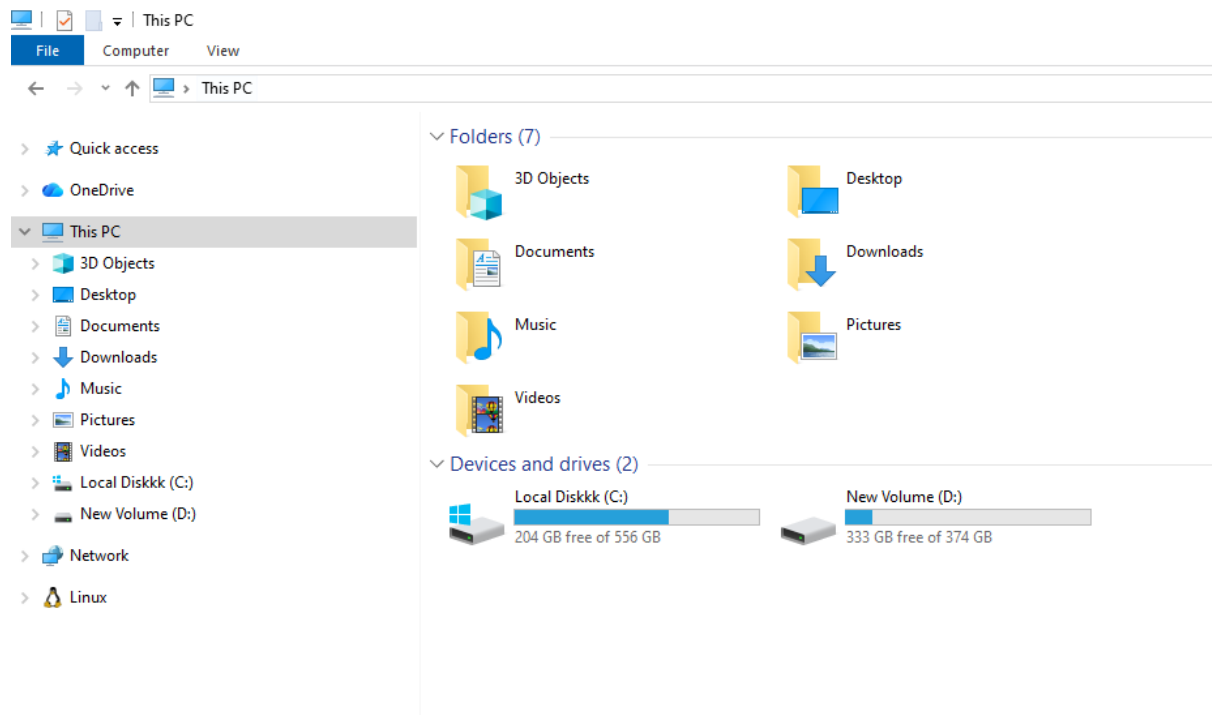

Task 3: Download VMware Workstation Pro and Ubuntu Server

VMware Workstation 16 Pro installed and running.

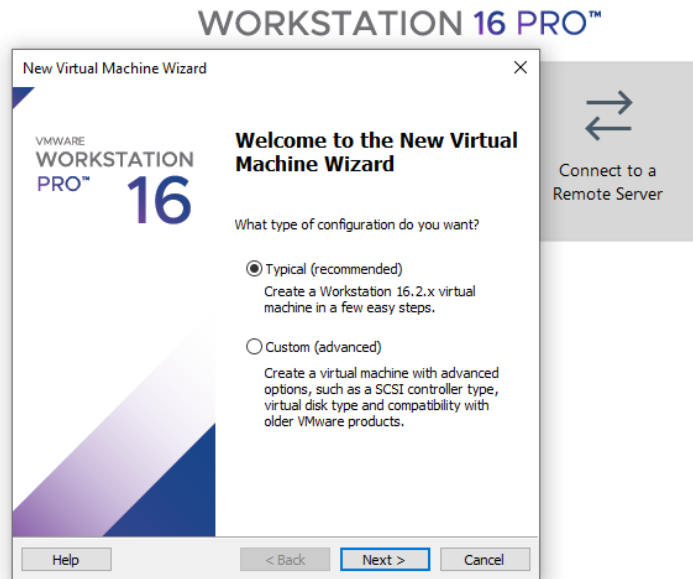

Downloaded Ubuntu Server ISO file (ubuntu-26.04.1-live-server-amd64.iso).

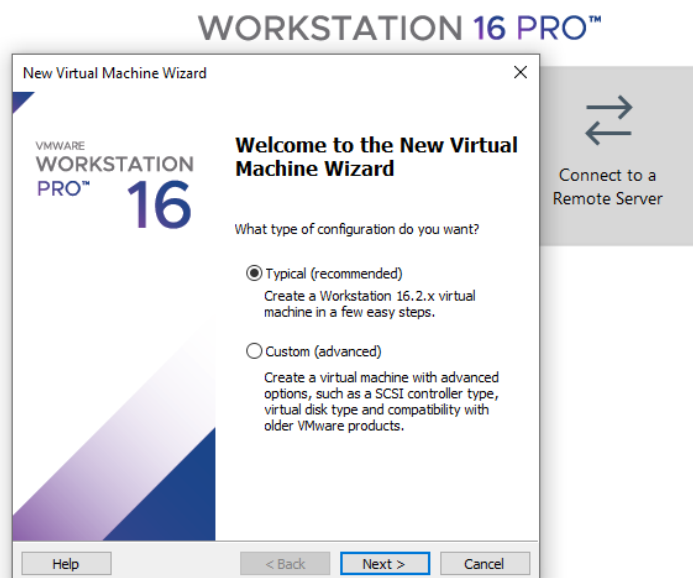

Available storage: C: drive has 204 GB free, more than the 20 GB required.

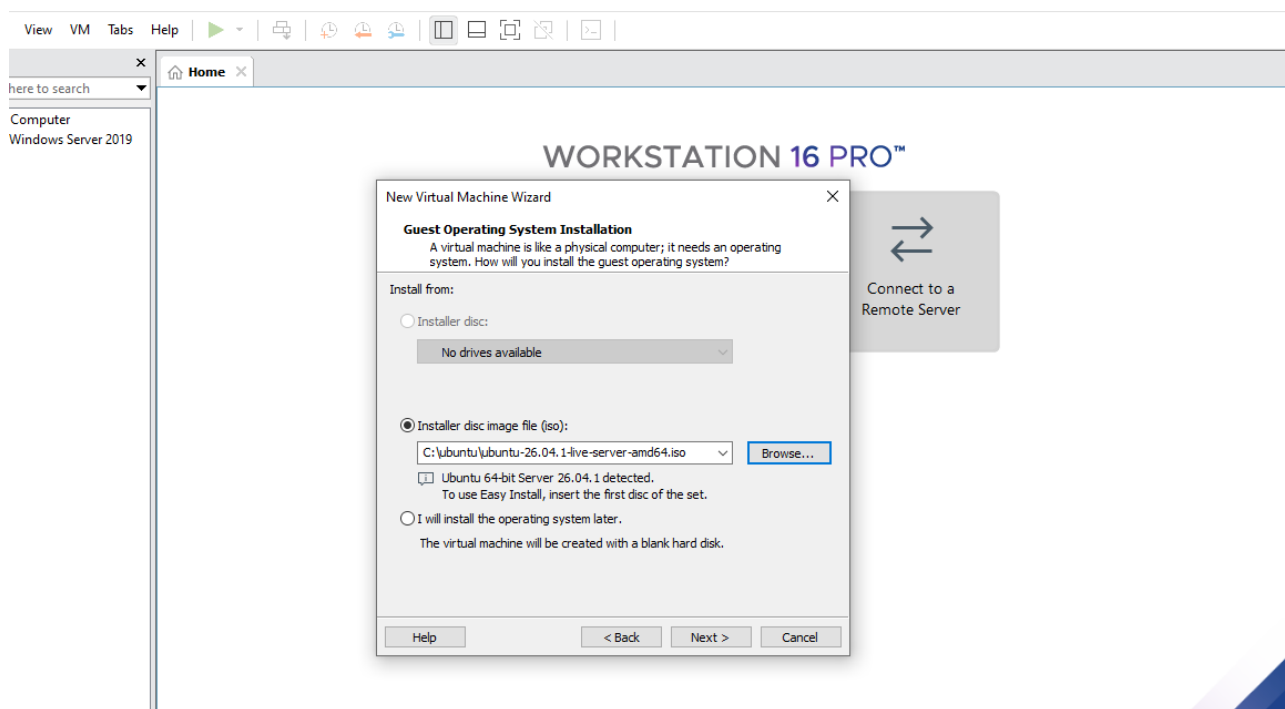

Task 4: Create the Ubuntu Server Virtual Machine

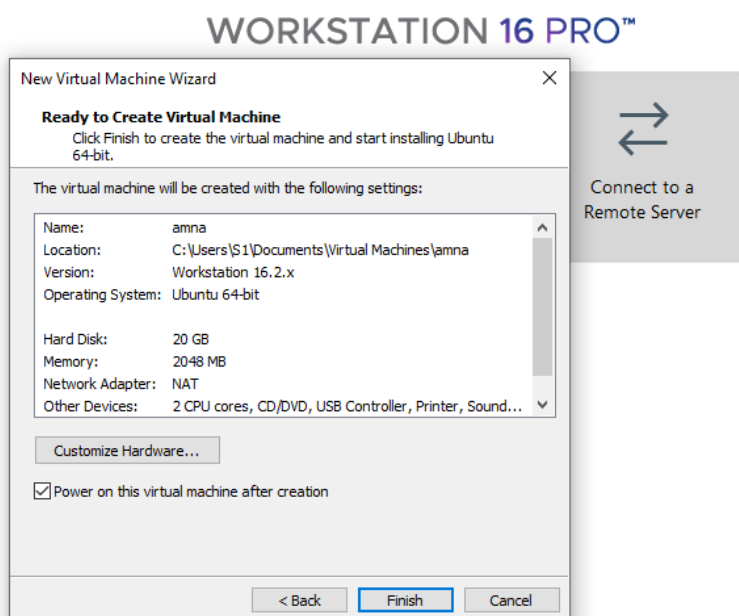

New Virtual Machine Wizard opened.

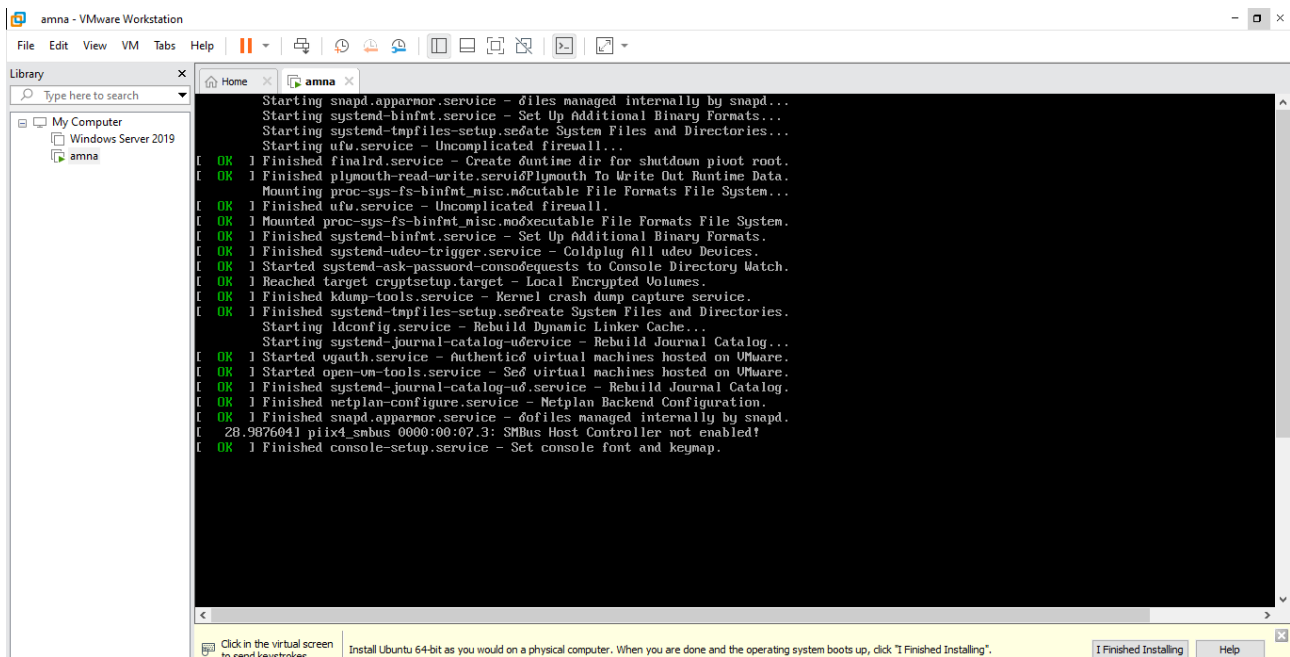

Typical (recommended) configuration selected.

Ubuntu Server ISO selected as the installer disc image file.

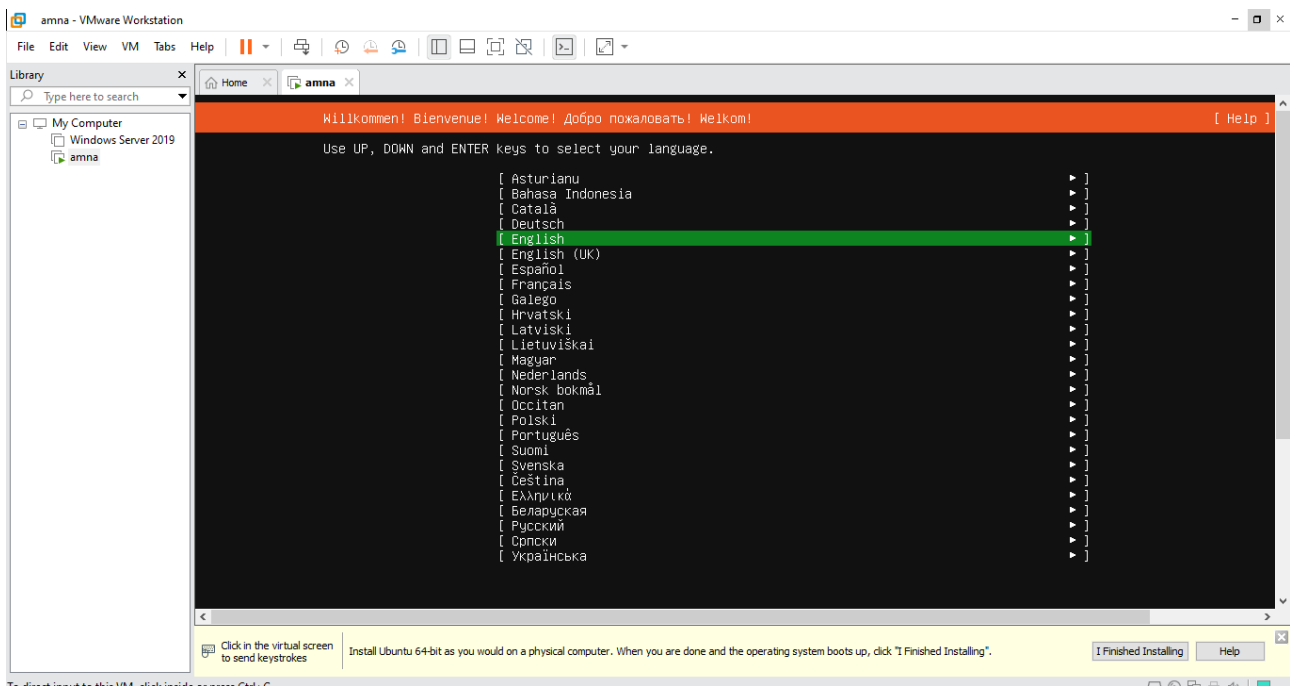

Final VM summary: Ubuntu 64-bit, 20 GB disk, 2048 MB memory.

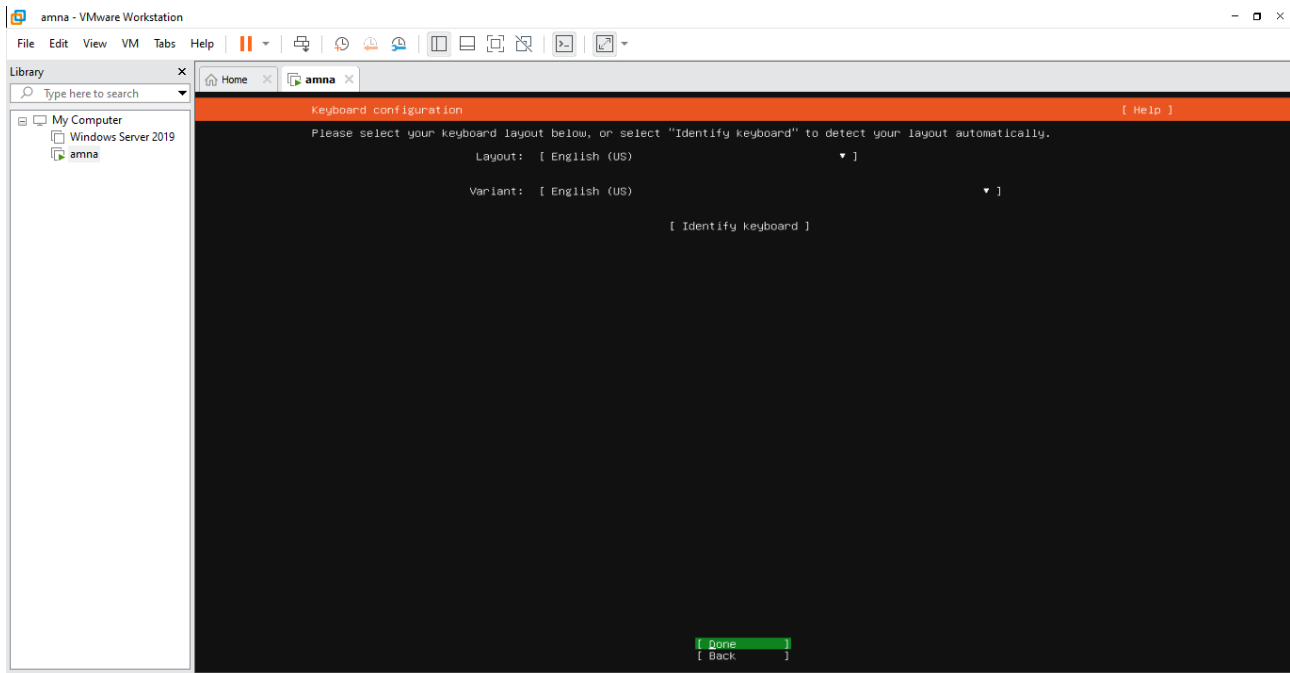

Ubuntu Server installer starting after powering on the VM.

Task 5: Choose the Installation Language

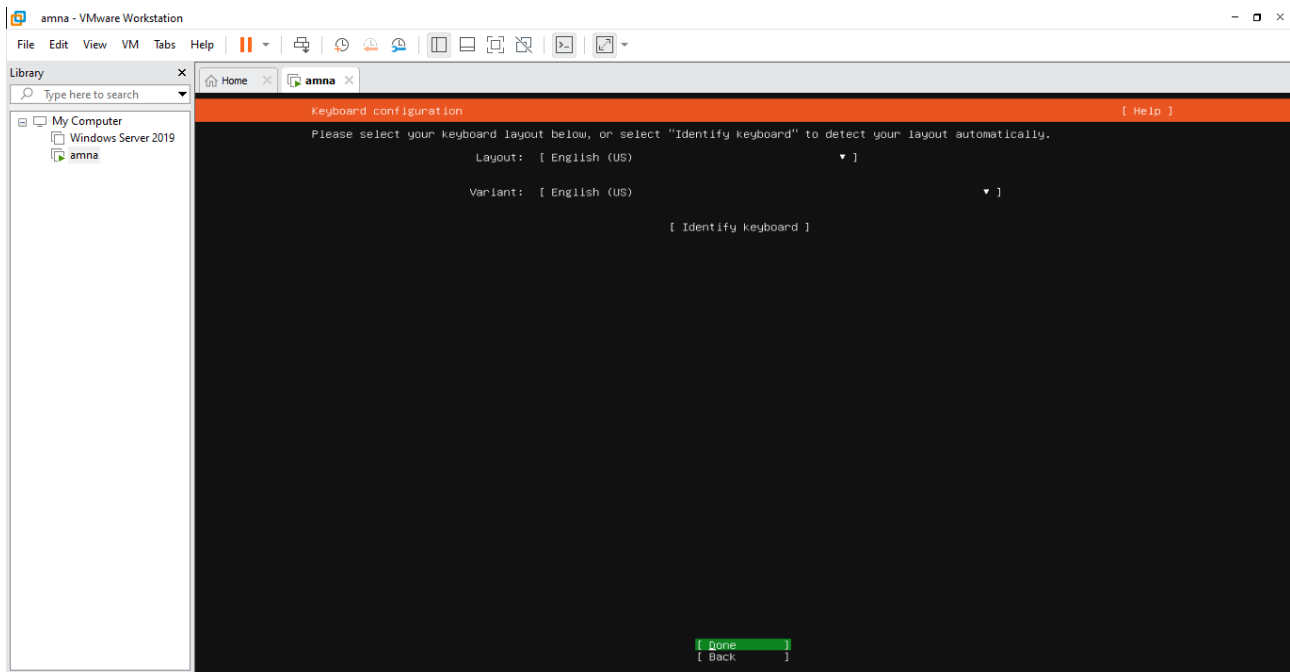

English selected as the installation language.

Task 6: Configure the Keyboard Layout

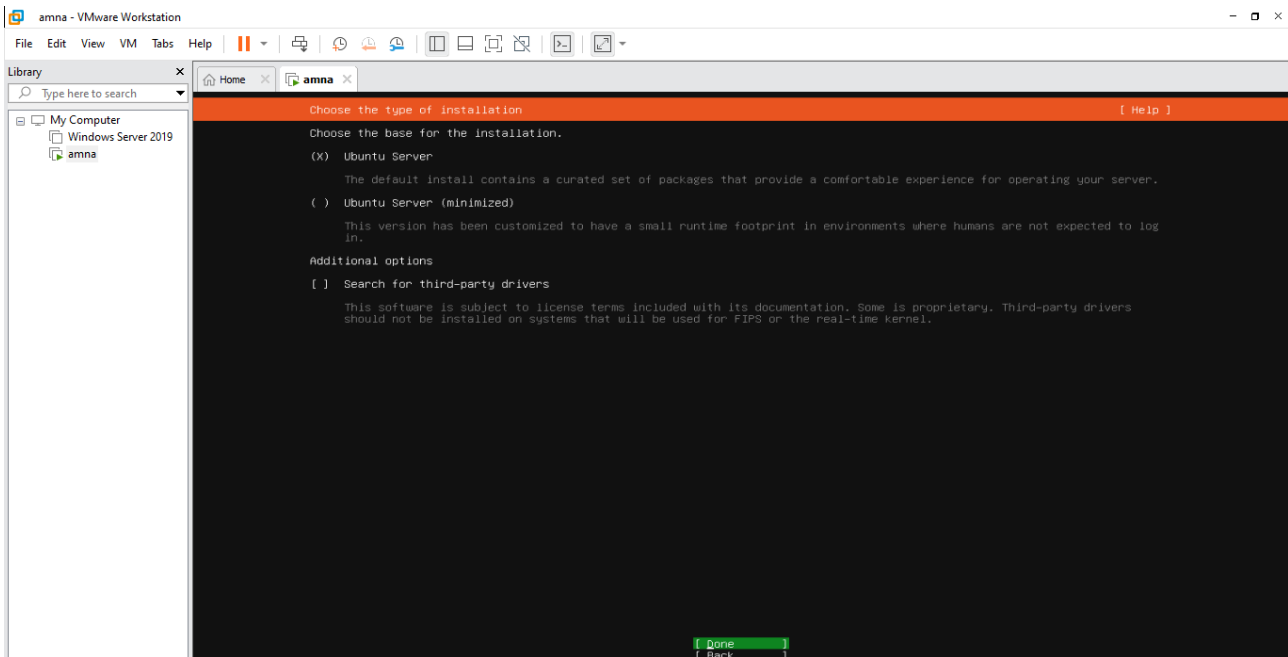

Keyboard layout set to English (US).

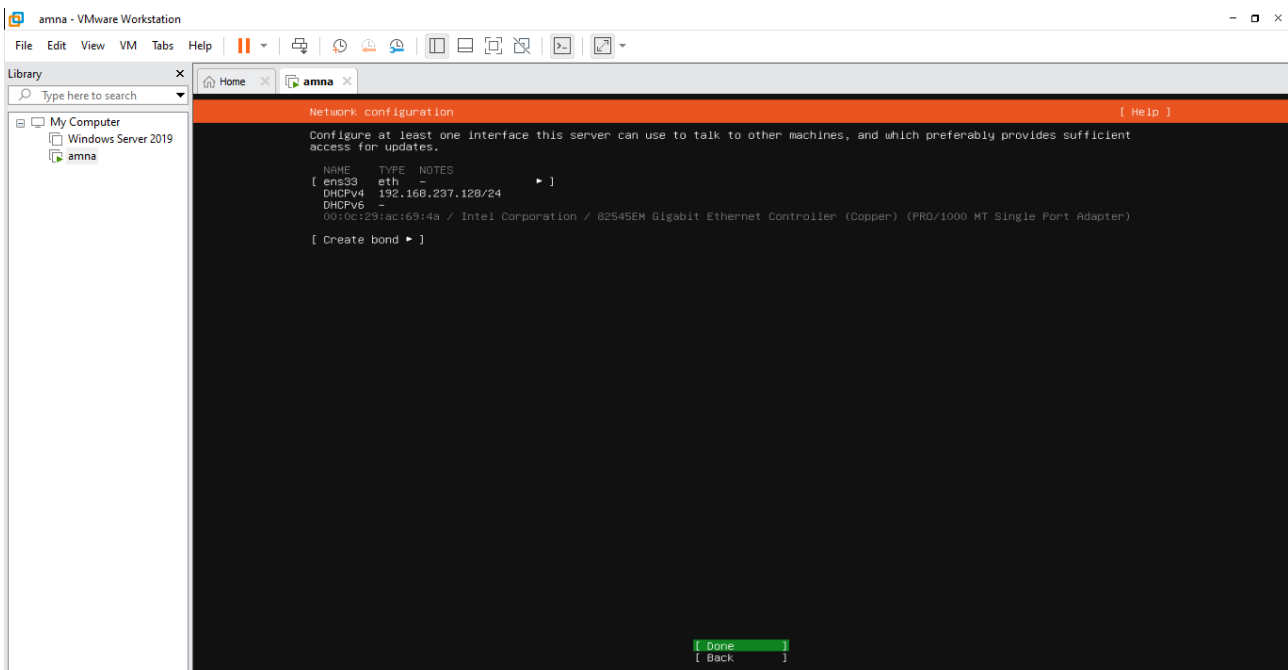

Keyboard variant set to English (US).

Task 7: Choose the Ubuntu Server Installation Type

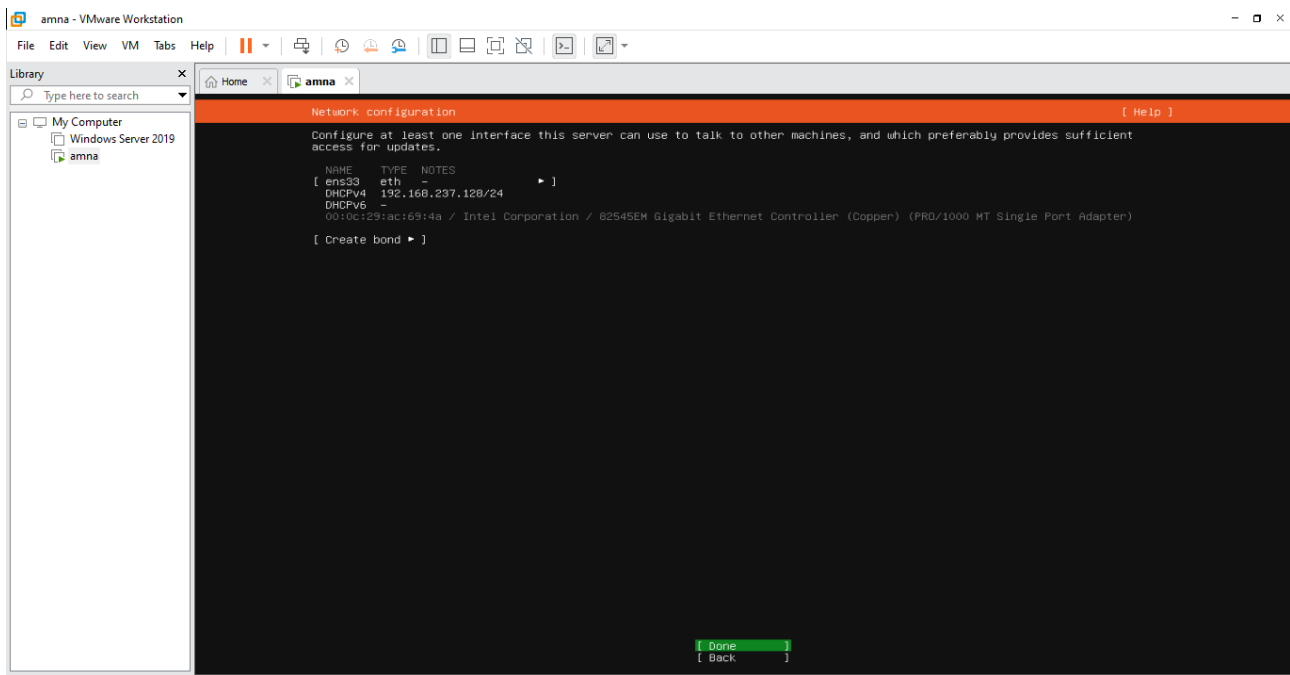

Standard Ubuntu Server (not minimized, no MAAS) selected.

Task 8: Configure the Network

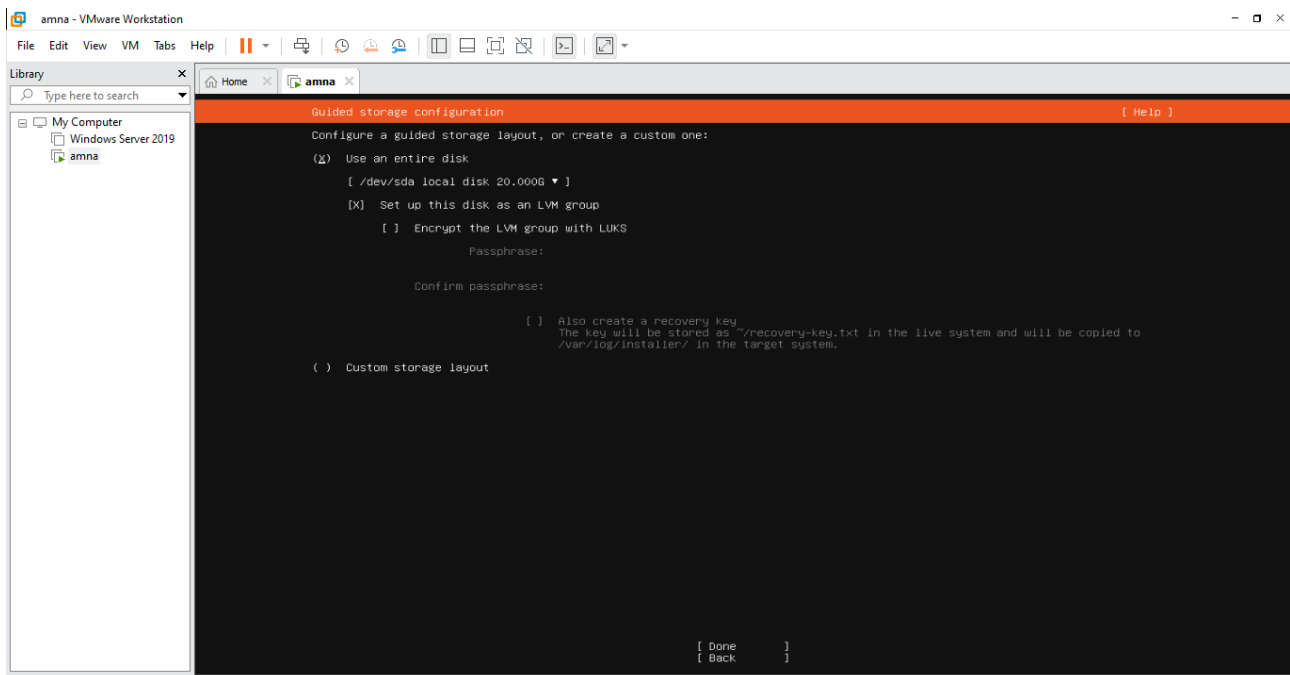

Network interface ens33 detected by the installer.

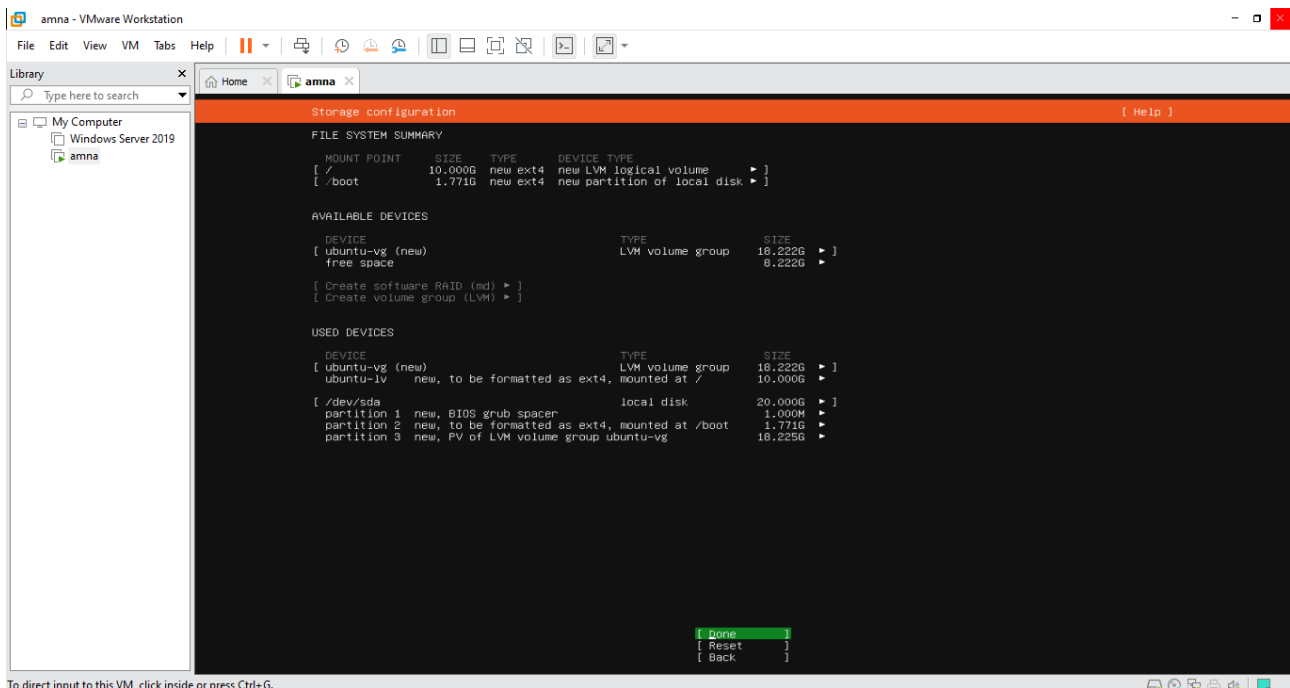

IP address 192.168.237.128/24 assigned automatically through DHCP.

Task 9: Configure Storage

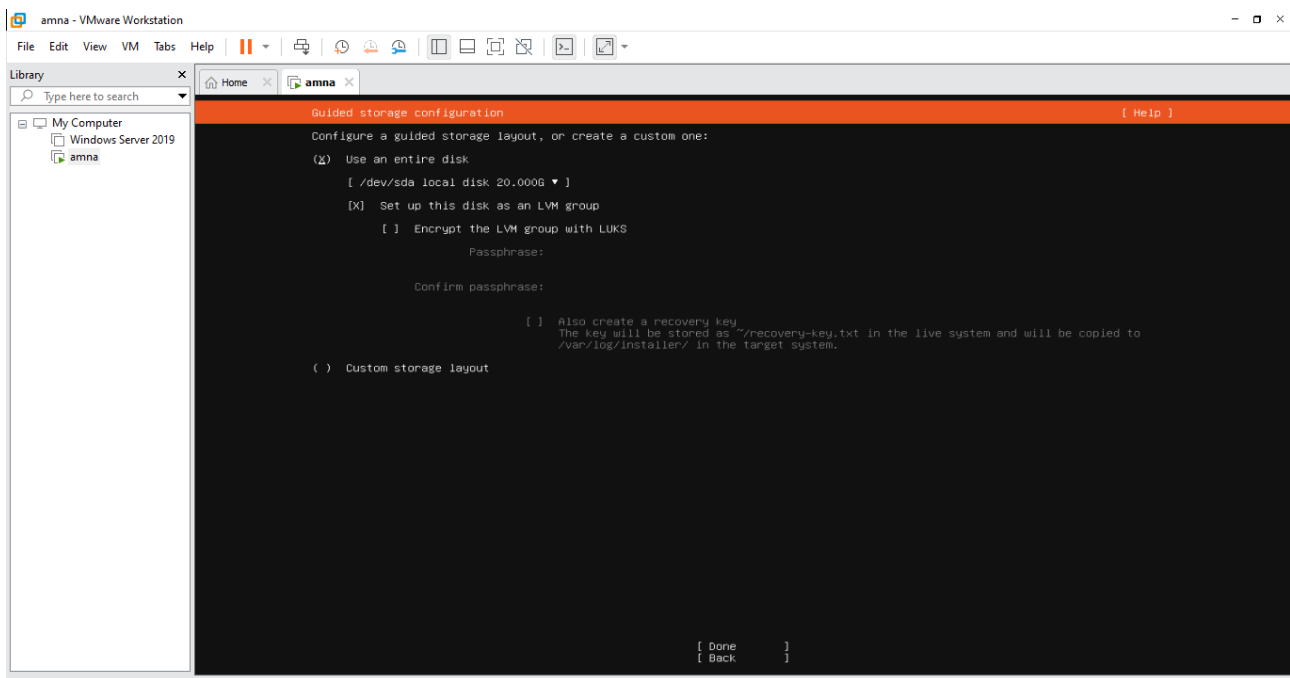

Guided storage option: use an entire disk.

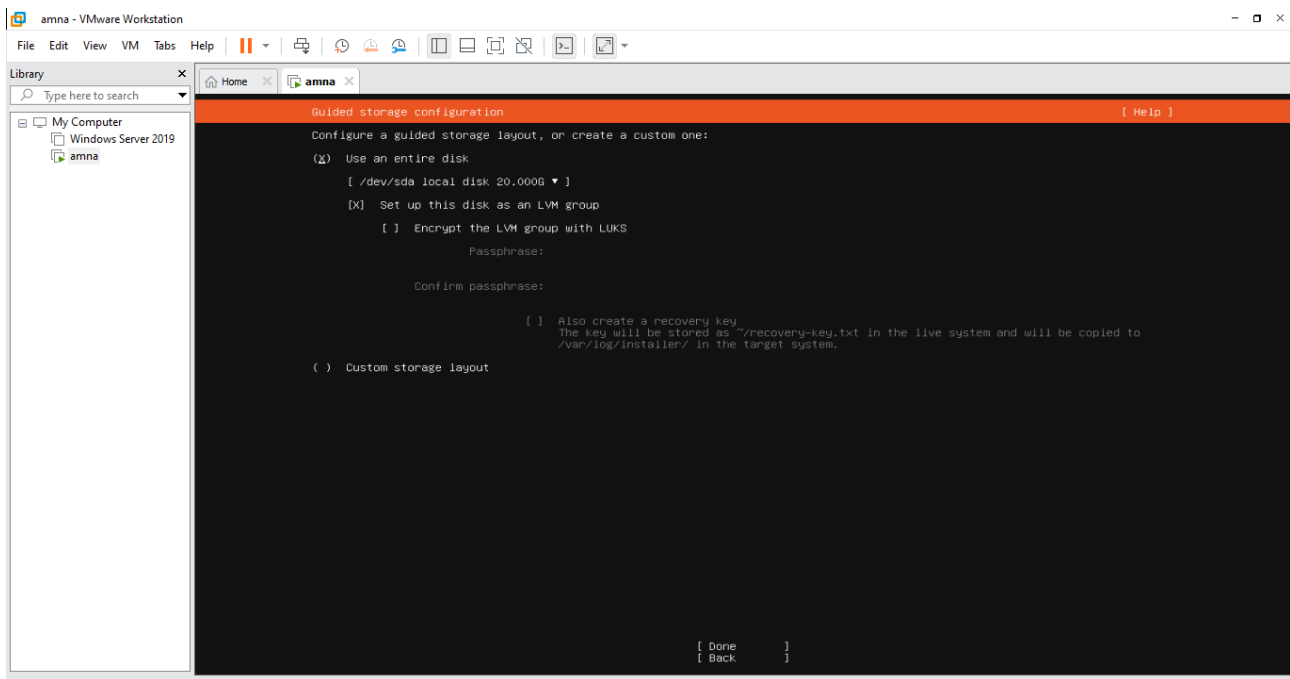

To direct input to this VM, click inside or press Ctrl+G.

Storage configuration summary reviewed before continuing.

Task 10: Select the Installation Disk

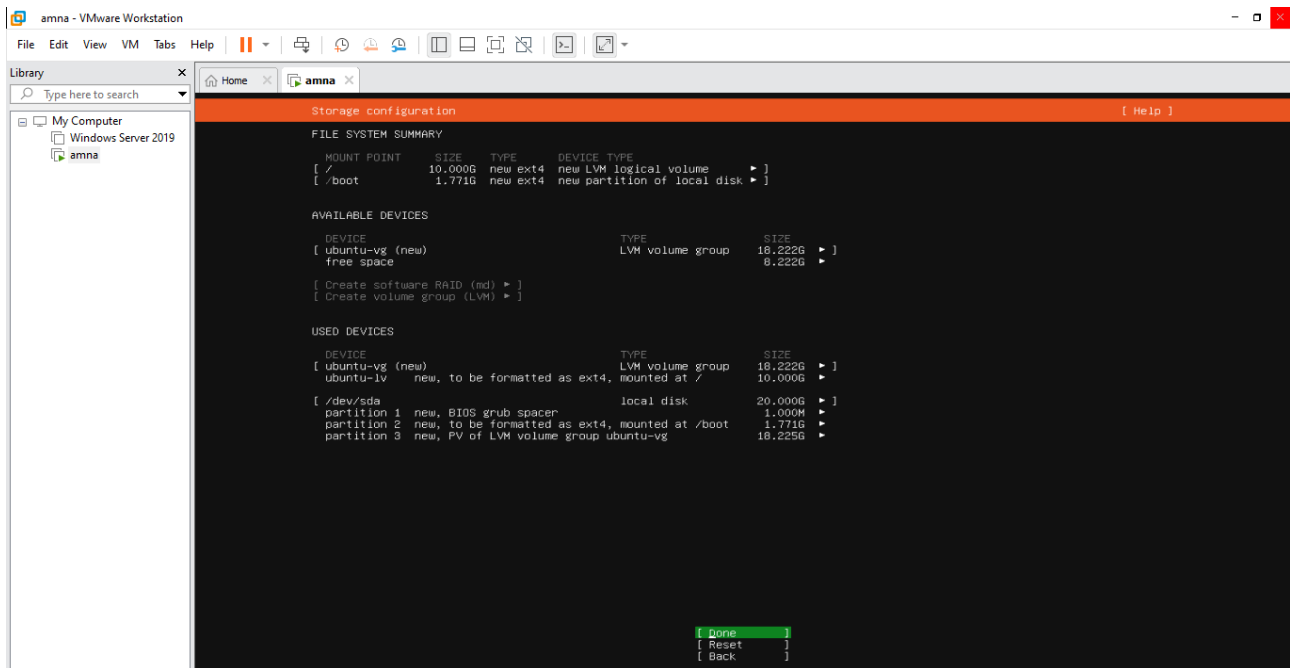

The 20 GB local VMware virtual disk selected.

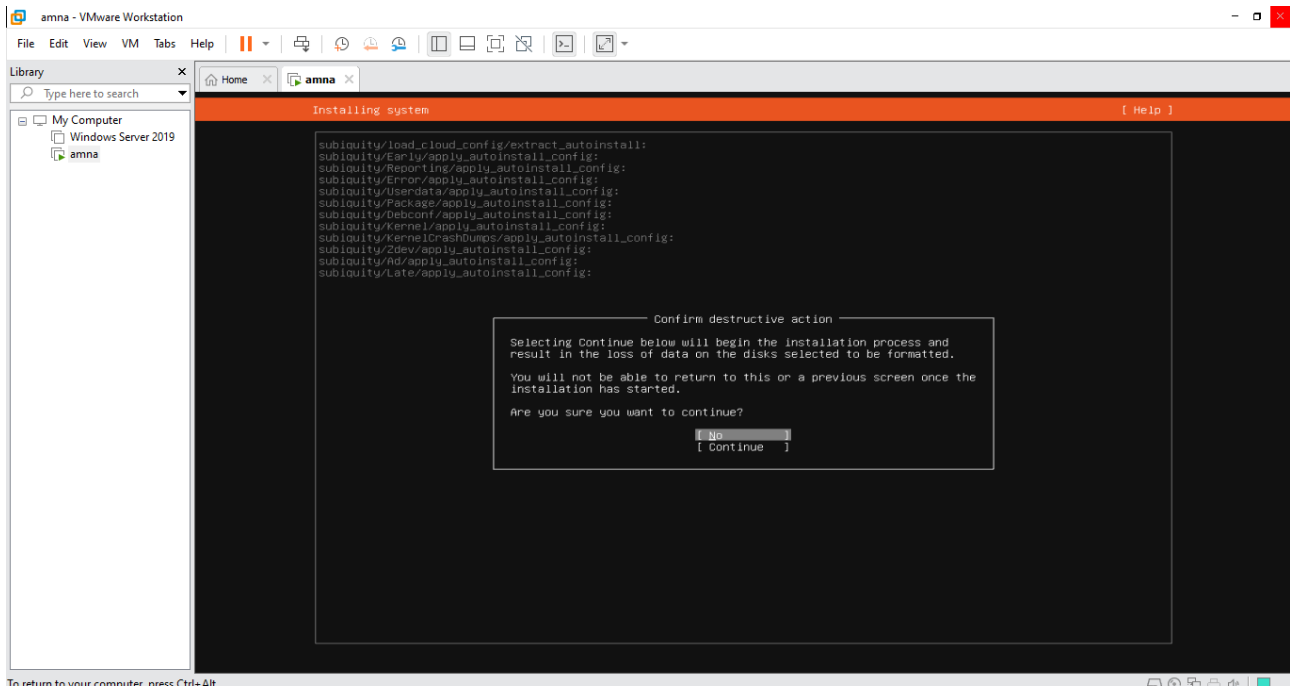

Disk name and size (/dev/sda, 20.000G) confirmed.

Task 11: Review the Partitions

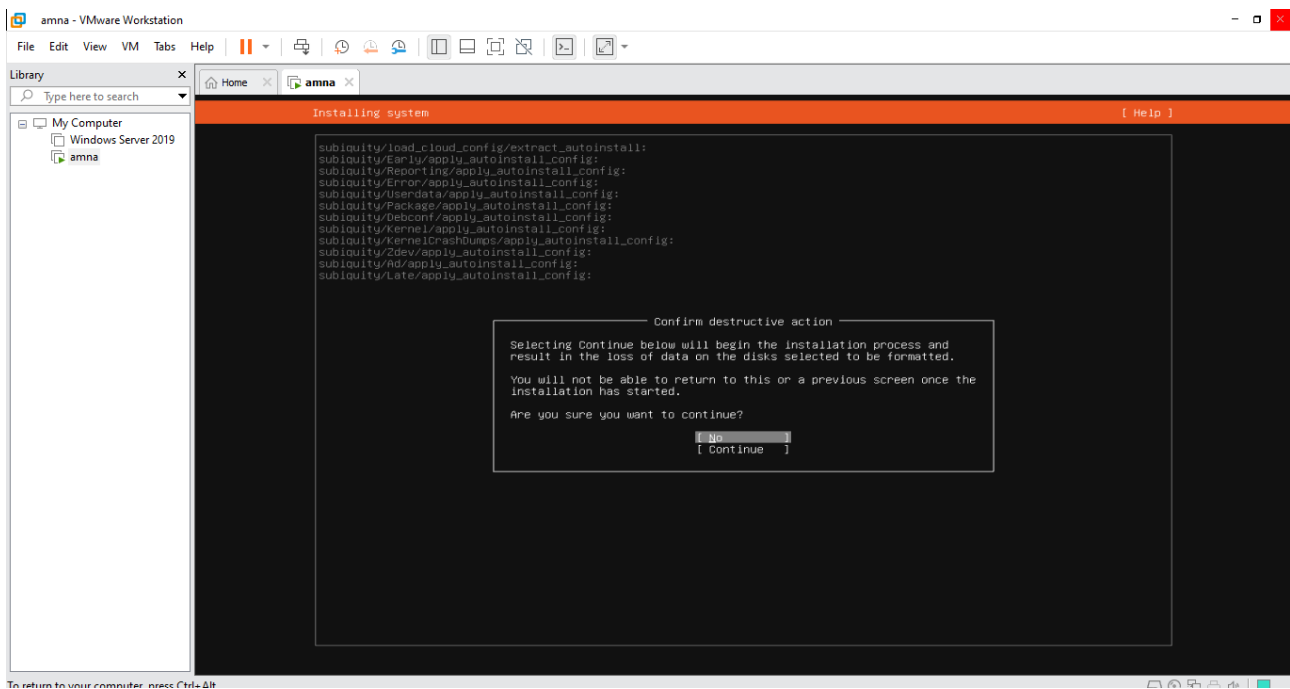

Proposed partition layout on the VMware virtual disk.

Task 12: Confirm the Storage Changes

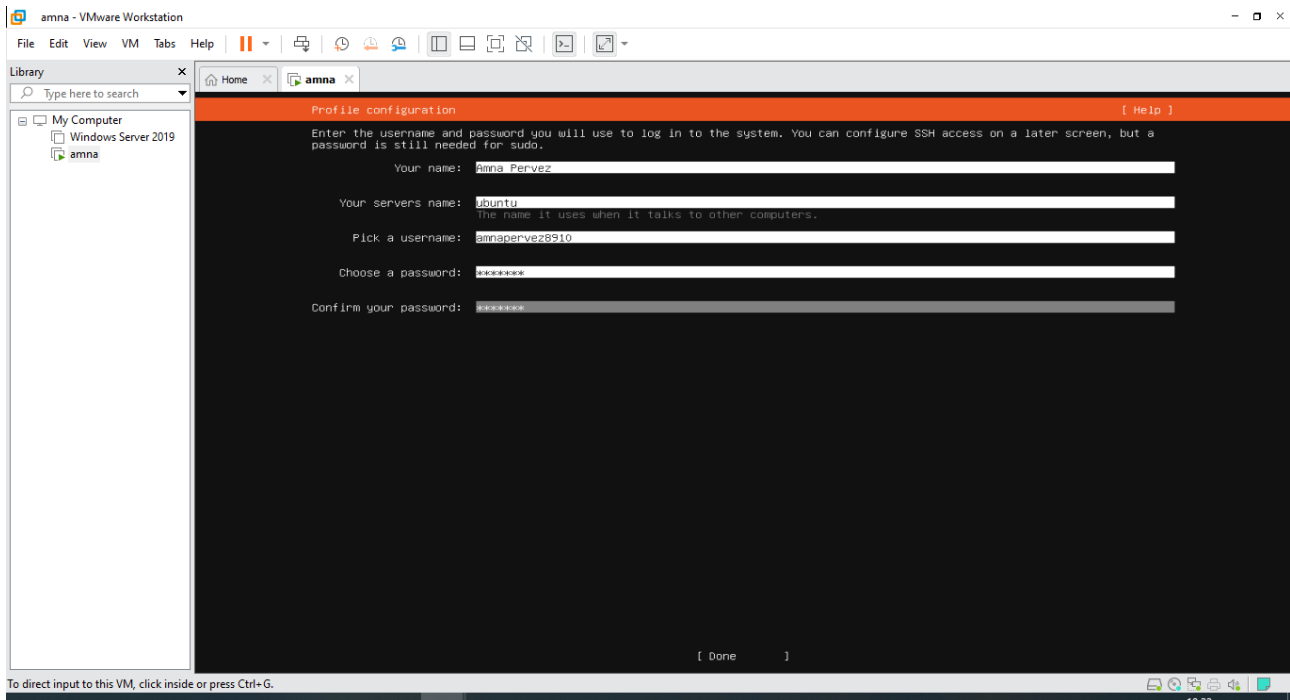

Destructive-action warning displayed by the installer.

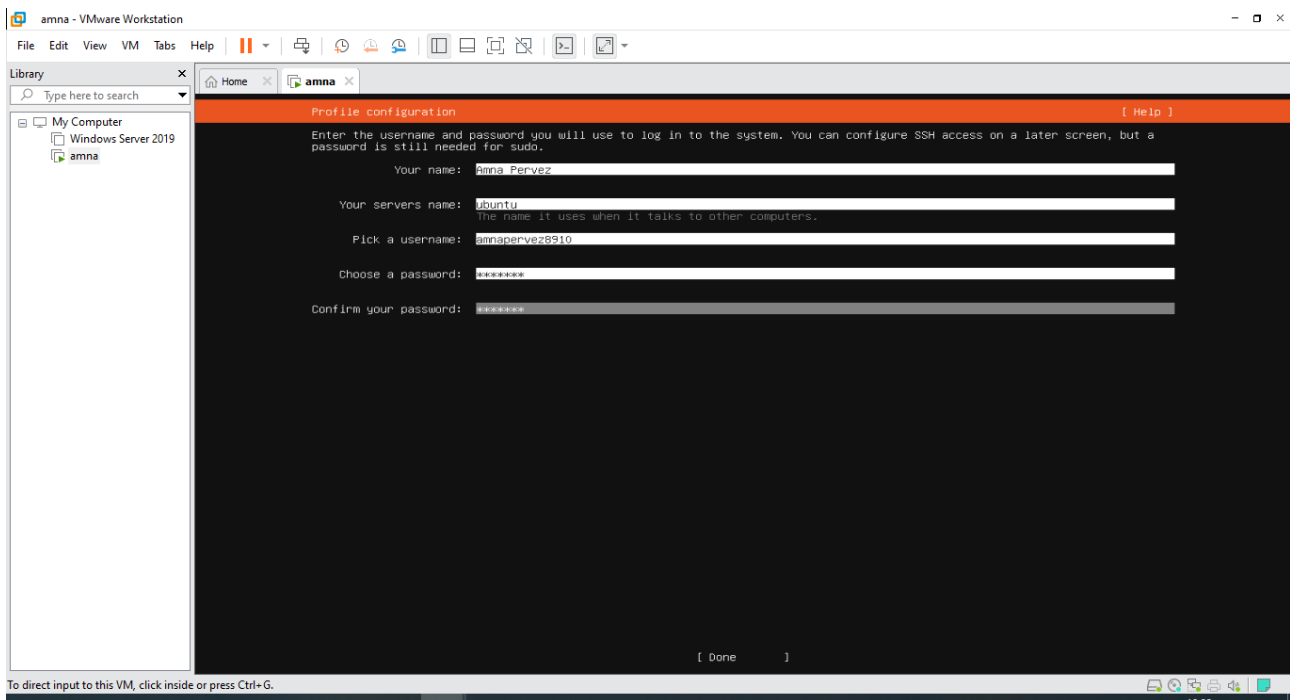

Continue selected to confirm the storage changes.

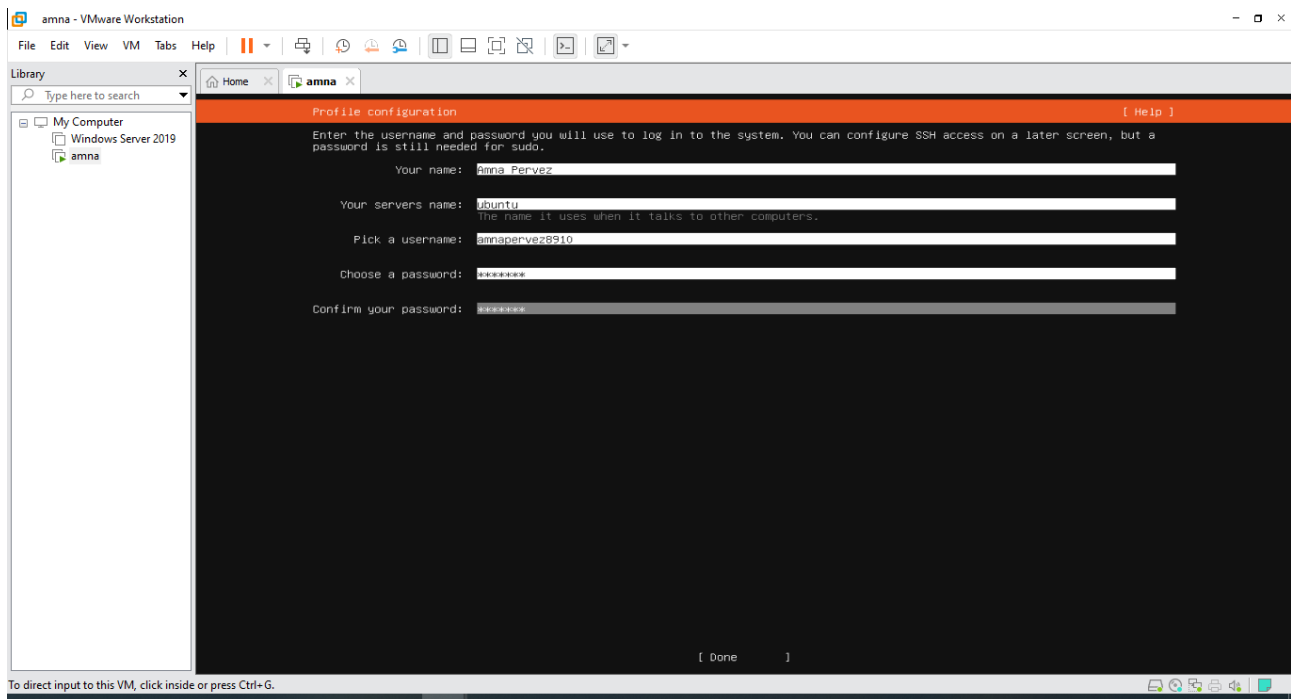

Task 13: Configure the Ubuntu Profile

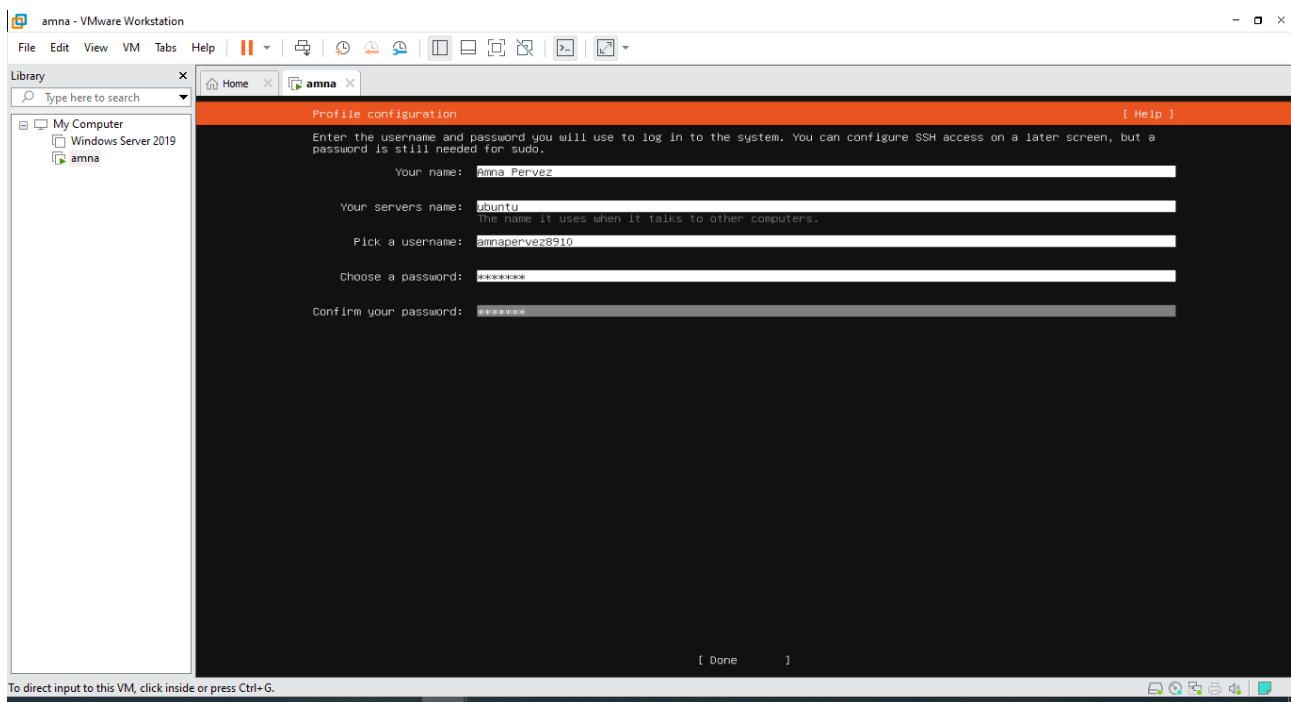

Your name field filled with the actual name.

Server name set to ubuntu.

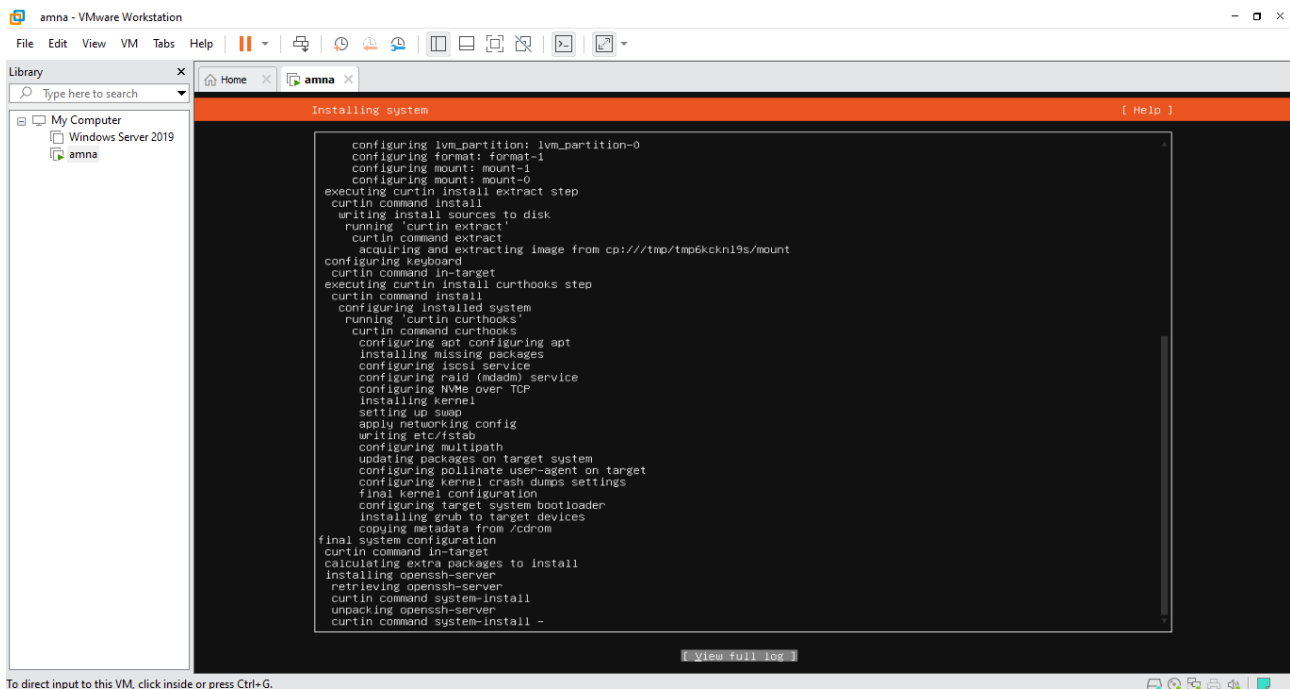

Username set to the GitHub username amnapervez8910.

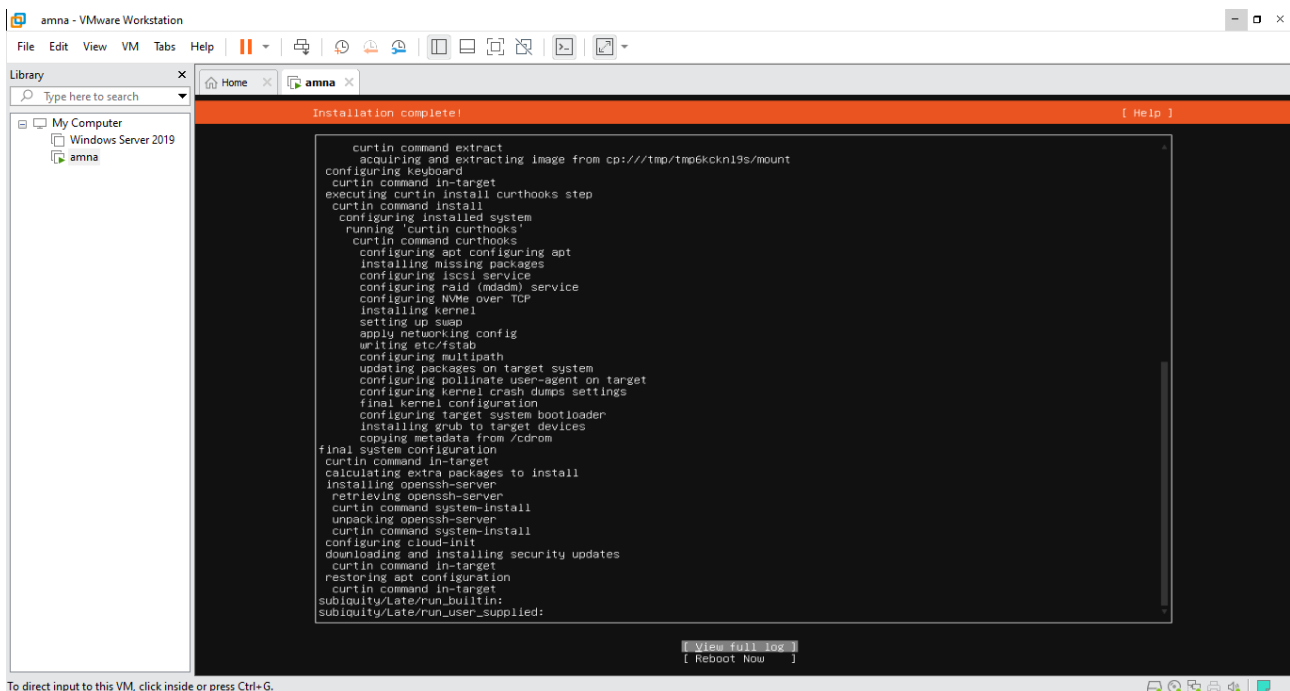

Completed profile page (password masked).

Task 14: Complete the Software Installation

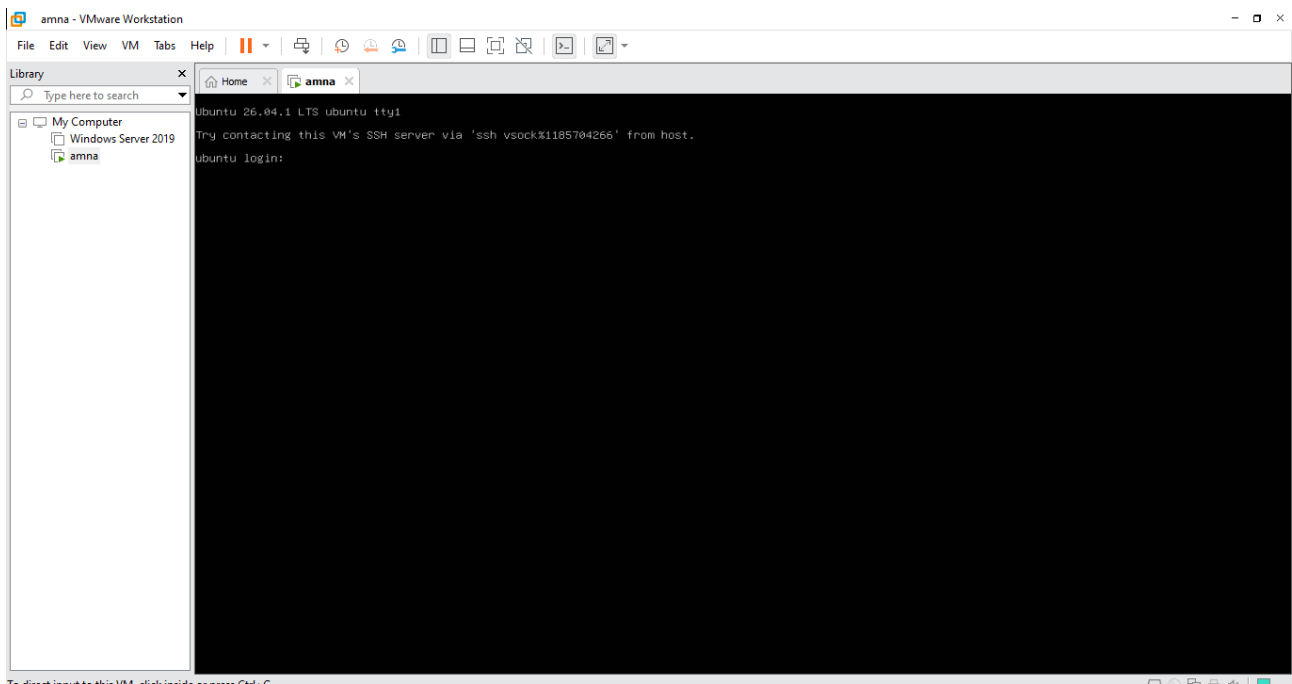

Ubuntu Server installation in progress.

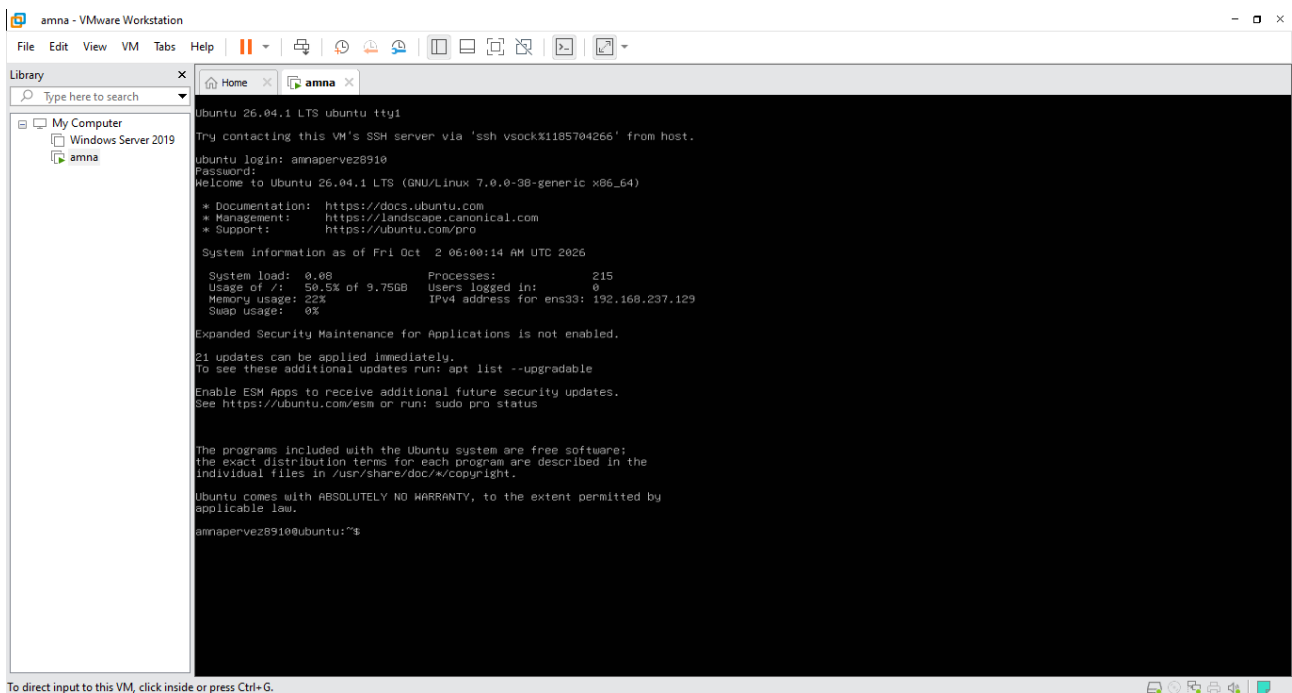

Task 15: Reboot and Verify the Ubuntu Identity

Installation complete screen with Reboot Now option.

Ubuntu login screen after reboot.

Successful terminal login.

The screenshot shows a VMware Workstation interface with a single virtual machine named 'amna' selected in the Library. The main window displays the terminal output of the 'amna' VM, which is running Ubuntu 20.04.1 LTS. The terminal content includes:

```
Welcome to Ubuntu 20.04.1 LTS (GNU/Linux 7.0.0-38-generic x86_64)
